Command Line for Linux

Issued by: Coursera

REON FERNANDES

SUMMARY

A motivated and tech-savvy professional with a Master's in Information Technology (GPA: 8.85), specializing in Java development and backend solutions. Proficient in frameworks like Spring Boot and tools like Git, with experience in creating RESTful APIs and secure authentication systems. Adept at designing scalable applications, and integrating databases (MySQL, MongoDB). Demonstrates strong problem-solving and collaborative skills, passionate about learning and contributing to innovative software solutions.

SKILLS

Java, JavaScript (basic), HTML, CSS, MySQL, MongoDB (basic), Git, Postman, Spring Boot (Spring Data JPA), Spring MVC, Thymeleaf, Object-Oriented Programming, RESTful APIs.

PROJECTS

Smart Contact Manager

10/2024 - Present

Technologies used: Java, Spring Boot, Spring MVC, Spring Data JPA, OAuth2, Thymeleaf, HTML, CSS, JavaScript, Git

- Implemented secure user authentication using email/password and OAuth2 (Google, GitHub).
- Integrated email verification for account activation.
- Provided features to view, update, delete, and search contacts with pagination.
- Enabled contact creation with images stored in the cloud via Cloudinary.
- Added email composition with text and attachments directly within the application

Quiz Application REST API

07/2024

Technologies used: Java, Spring Boot, JPA, MySQL

- Built a RESTful API for dynamic quiz creation, management, and participation.
- Implemented CRUD operations for quizzes, questions, and user responses.
- Added custom exception handling to manage errors effectively.
- Centralized error handling to ensure meaningful error responses and improve user experience.
- Extensively tested the API using Postman.

To-Do App

11/2024

Technologies used: Java, Spring MVC, Thymeleaf, HTML, CSS, JavaScript, MySQL

- Developed a To-Do Application using Spring MVC and Thymeleaf with full CRUD operations and MySQL database integration.
- A Simple, user-friendly interface displaying all tasks with real-time updates.

github.com/FernandesReon/ToDo-Application

Weather Application

11/2024

Technologies used: HTML, CSS, JavaScript and Open Weather API

- Integrated Open Weather API to fetch real-time weather data, including temperature, conditions, and forecasts.
- Designed a user-friendly search functionality for fetching weather details of specific locations.
